

Next Generation Nepal

## 16 years of bringing children home!

---

**ALERT!**  
**April 7, 2023**

**Help us take action now!**  
**22 Children are waiting to be rescued immediately.**  
**Donate to bring these kids home!**

Hundreds of children are "stuck" in illegal homes where the care is limited and the children are separated from their families - often for years! The Government of Nepal is actively closing down these homes which are operating illegally and where the children become victims of hunger and lack of care.

We have 22 children that we need to rescue, find their families and assure ourselves that these children will not end up in another illegal home in the future. Your donation is critical to bringing home these kids safely.

Rescues and reintegration of children takes resources! We need your support to send our teams into the field to find the families, assess the family situation and finally, take these kids home to their families where they are safe and well cared for.

Help us do this! More and more children need to be rescued! We can do this together!
